№ 01 SUMMARY

Fullstack engineer with five years of client work — shipping *real software* across many industries, learning what holds up under live users. Strongest on the TS / React / Node / Postgres axis; comfortable taking *AI/LLM features* from demo to production. Freelancing since 2026 — open to projects, full-time roles, and partnerships.

№ 02 SKILLS

LANGUAGES TypeScript · JavaScript · SQL · Python

FRONTEND React · Next.js · React Native · Vite · Tailwind · shadcn

BACKEND Node · Hono · Express · Drizzle · Prisma

DATA Postgres · Redis · pgvector · Elasticsearch

AI / LLM OpenAI · Anthropic · Vercel AI SDK · RAG · evals

CLOUD / DEVOPS AWS · Vercel · Docker · GitHub Actions

PRACTICE Testing · profiling · code review · clean DB schemas

№ 03 LANGUAGES

№ 05 EXPERIENCE

Freelance *Engineer*

2026 — PRESENT
TEL AVIV · REMOTE

Solo client work · web apps, AI tooling, product engineering

- Web apps end-to-end on a TS / React / Node / Postgres stack — discovery through shipped product.
- AI / LLM feature work for clients: prompt pipelines, RAG, evals, structured outputs, cost & observability.
- Rescue work on inherited codebases — tracing production bugs, performance audits, pre-launch cleanups.
- Tech consulting: architecture reviews, stack decisions, hire-or-build calls.

Fullstack *Engineer*

2021 — 2026
TEL AVIV

tech.co.il · multi-industry consulting / projects house

- Five years shipping software for clients across *many industries* — internal tools, customer-facing products, integrations, data pipelines.
- Owned features end-to-end: requirements with stakeholders ' design ' ship ' iterate under real load.
- Worked across the stack as the project demanded — TS & React on the frontend, Node services on the backend, Postgres schemas that actually held up.
- Brought in early on AI / LLM work as that capability matured — from POCs into production-grade features.
- Code-reviewed and mentored juniors; flagged when the brief was rough or the database design needed a second look.

№ 06 SELECTED PROJECTS

Music *Practice*

[music-practice.orensayag.com ↗](#)

A focused practice companion for disciplined musicians — plan sessions, record audio, track progress over time.

React Hono Drizzle Postgres

Article *Quiz*

[article-quiz.orensayag.com ↗](#)

Web app that turns any article into a comprehension quiz with LLMs — paste a URL, verify you actually read it.
